

The Child Abuse Prevention Council of Napa County Presents
An Evening with...
Dr. Bonny Forrest

“What Are Our Kids Worth?”

We say “Kids are our future” and “We need to do more,” but a significant percentage of our children live in homes with violence, go to bed hungry or struggle in school due to mental health issues. Childhood adversity has lifelong implications for a person’s future health, academic and career success, which costs society billions of dollars each year!

A leader in the field of child development, Dr. Bonny Forrest has been an advocate for children for over twenty years. A practicing attorney and a child psychologist, she has vast experience in working with children in a variety of settings. Dr. Forrest will lead us in a conversation about **why** our kids are worth investing in **TODAY!** Countering childhood adversity pays dividends for the larger community and improves the trajectory of kids’ lives.

Dr. Bonny Forrest is a frequent guest on CNN, NBC & FOX networks.

Wednesday, April 6th, 2016
Napa Valley College Performing Arts Center
